Cloud Hosted Servers – Fair Usage Policy

1. Purpose

The Fair Usage Policy prevents excessive use of shared hosting resources that could affect other users on the server.

2. Storage and Bandwidth

- Storage is limited to the agreed quota stated in your plan. Excess usage may result in additional charges or service restrictions.
- Bandwidth is provided on a fair use basis. Unusually high traffic that affects server performance may trigger throttling or suspension.

3. Resource Limits

- Scripts or applications that overload the server or consume excessive CPU/memory may be disabled without notice.
- Hosting plans are not intended for file sharing, video streaming, or mass email distribution unless explicitly agreed upon.

4. Email Usage

- Outgoing emails are limited to a fair volume per day to prevent blacklisting.
- Spam, unsolicited mail, or bulk marketing is strictly prohibited.

5. Monitoring and Enforcement

- We actively monitor usage patterns.
- If your usage is deemed excessive, we will contact you to discuss upgrade options or alternative solutions.
- Continued abuse may result in suspension or termination of services.
